

HOSPITAL MANAGEMENT SYSTEM

USE CASE FLOW

Goal	UC-01 – Patient Registration & Login
Actor	Patient
Main flow	1. Patient opens the system. 2. Patient selects Register. 3. Patient enters name, age, sex, phone number and email. 4. System validates the entered details. 5. System sends an OTP to the registered phone number. 6. Patient enters the OTP. 7. System verifies the OTP and creates the patient account. 8. Patient enters valid login credentials. 9. System authenticates the patient and provides access.
Alternate Flow	At Step 4, if the entered login credentials are invalid, the system displays an error and asks the patient to enter the credentials again.

Goal	UC-02 – OTP Verification
Actor	Patient
Main flow	1. Patient provides the registered phone number. 2. System generates and sends an OTP. 3. Patient enters the received OTP. 4. System validates the OTP. 5. If the OTP is correct, the phone number is verified. 6. System allows the patient to continue registration/login.
Alternate Flow	At Step 4, if the OTP is incorrect, the system rejects the verification and asks the patient to enter the correct OTP.

Goal	UC-03 – View Medical History
Actor	Patient / Doctor
Main flow	1. User logs into the system. 2. User selects the patient's medical history. 3. System verifies user authorization. 4. System retrieves the patient's stored medical history and reports. 5. System displays the available medical information.
Alternate Flow	At Step 3, if the user is not authorized, the system denies access to the patient's medical information.

Goal	UC-04 – Doctor Availability & Appointment Booking
Actor	Patient
Main flow	1. Patient logs into the system. 2. Patient selects the required medical field. 3. System displays available doctors. 4. Patient selects a doctor. 5. System displays available appointment schedules. 6. Patient selects an available slot. 7. System confirms and stores the appointment. 8. System displays the appointment confirmation.
Alternate Flow	At Step 5, if no appointment slot is available, the system informs the patient and displays other available

	schedules/doctors.
--	--------------------

Goal	UC-05 – Appointment Cancellation
Actor	Patient
Main flow	1. Patient logs into the system. 2. Patient views booked appointments. 3. Patient selects an appointment to cancel. 4. System displays the appointment details. 5. Patient confirms cancellation. 6. System updates the appointment status to cancelled. 7. System makes the slot available again.
Alternate Flow	At Step 5, if the patient does not confirm cancellation, the appointment remains active.

Goal	UC-06 – Medical Diagnosis & Reports
Actor	Doctor
Main flow	1. Doctor logs into the system. 2. Doctor selects the patient's appointment/record. 3. System displays the patient's available medical history. 4. Doctor examines the patient. 5. Doctor enters the initial diagnosis. 6. Doctor specifies the required reports/scans. 7. System saves the diagnosis and required reports/scans to the patient's record.
Alternate Flow	At Step 3, if required patient information is unavailable, the doctor can proceed with the available information and enter the diagnosis.

Goal	UC-07 – Prescription Management
Actor	Doctor / Patient
Main flow	1. Doctor logs into the system. 2. Doctor opens the patient's medical record. 3. Doctor enters the final prescription and medication details. 4. System validates and stores the prescription. 5. Patient logs into the system. 6. Patient opens the prescription section. 7. System displays the stored prescription.
Alternate Flow	At Step 4, if prescription details are incomplete, the system asks the doctor to provide the required information before saving.

Goal	UC-08 – Online Payment & Medicine Purchase
Actor	Patient
Main flow	1. Patient views the prescribed medicines. 2. Patient selects the required medicines. 3. System calculates the payment amount. 4. Patient selects online payment. 5. Patient provides the required payment details. 6. System processes the payment securely. 7. System confirms successful payment. 8. System records the medicine purchase.
Alternate Flow	At Step 6, if payment fails, the system displays the payment failure and allows the patient to retry.

Goal	UC-09 – File Download
Actor	Patient
Main flow	1. Patient logs into the system. 2. Patient opens the medical documents section. 3. System displays available reports, prescriptions and other files. 4. Patient selects the required file. 5. Patient selects Download. 6. System downloads the selected file to the patient's device.
Alternate Flow	At Step 5, if the selected file is unavailable, the system displays an appropriate error message.

Goal	UC-10 – Check Bed Availability
Actor	Hospital Staff / Patient
Main flow	1. User accesses the bed availability section. 2. System retrieves the current bed information. 3. System checks the status of available beds. 4. System displays the current bed availability as available or occupied.
Alternate Flow	At Step 3, if no beds are available, the system displays that all required beds are currently occupied.
